## About Me...

24 years old and currently living in south London I'm a highly motivated and ambitious Moving image / Graphic Designer. With Moving Image Design as my bias I have found that my core design interests lean predominantly towards branding / promos and at a push, advertising.

My industry experience, though modest, has accumulated predominantly throughout my final two years at Ravensbourne, managing to juggle freelance work with uni work and occasionally crossing over between the two.

## Technical Skills

I have an extremely nerdy understanding (borderline obsession) of Adobe After Effects, albeit standing one step shy of losing my social life to scripting/expressions. I also have an advanced understanding of Photoshop, Illustrator, Premier and Dreamweaver (I speak fluent CSS/HTML) and have a pretty good understanding of Indesign.

A lot of my work has been shot against green screen using 'reflect media' kit, so I'm more than comfortable setting up and working within a studio whether on my own or as part of a team.

## Education

BA(hons) Design For Moving Image  
Ravensbourne College of Design and Communication

National Diploma Moving Image  
Bedford College
